ENERGY SAVING

* Bases are forged bound by over 2500 tons pressure
* %95 pure aluminum
* Bottom plates combine chemically over %99

* Combine with brazing machine
* Standart aluminum. not pure
* %55 combining of the 3. Layer

Perfect even cooking

Sticking. burning possiblity Variable heat

Sticking. burning High heat

-
- Handles are reinforced with extra durability, there is no weight-induced bending, even in the largest pots.

-
- Each pot has its production date on its handles. Quality control and follow-up of the products continue after entering the kitchens. Each pot has a 5 year warranty.

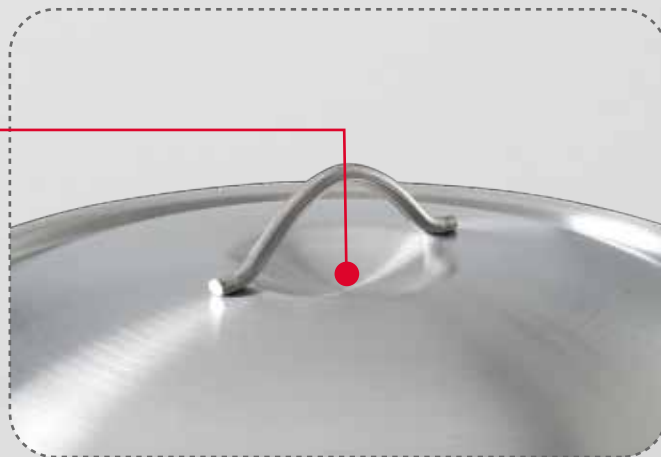

**ENERGY SAVER
IMPACT BONDING**

-
- Every product with "Impact" base technology has under Kapp's guarantee for 5 years.
-

10

Small details make a big difference

The extra space between the handle and the lid allows the chef's hands to fit comfortably without touching the hot lid. Creating a safer cooking experience.

A photograph of two champagne flutes filled with bubbly champagne. The glasses are positioned side-by-side, with the one on the right slightly in front of the one on the left. The champagne is a golden-yellow color with many fine bubbles rising to the surface. The background is a soft-focus bokeh of warm, golden lights, suggesting a festive or celebratory atmosphere. A red dashed circle is drawn around the word 'Stands', which is written in a red, sans-serif font. The word is located in the upper left quadrant of the image, partially overlapping the left champagne flute.

A close-up photograph of a stack of stainless steel food pans. The pans are arranged in a way that shows multiple layers. A red dashed circle is drawn around one of the pans in the upper left portion of the stack. The pans have a rectangular shape with rounded corners and a slightly raised rim. Some pans have a perforated pattern on their sides. The lighting is bright, creating reflections on the metallic surfaces.

Impact Resistant Polycarbonate Pans

- High impact resistance. unbreakable
- No corner and border deformation due to high impact resistance
- High acid-proof. impenetrable
- Heat endurance between +100°C / -40°C, + 212°F / - 104 °F
- Suitable for microwave oven
- Stackable one within the other
- Light . easy to carry
- No hazardous substances on human health
- Easy to use due to the transparent structure

Patented Heated Glasses

- **World's First:** Anti-fog glass allows visibility without opening lids, preserving food temperature and hygiene.
- **No Drips:** Prevents water droplets from forming and dripping onto food.
- **Energy Efficient:** Heats from the center for optimal energy savings.
- **Stylish Design:** Stainless steel in various colors enhances buffet aesthetics.
- **Safety First:** Special insulation prevents short circuits from electricity and water vapor.
- **Smooth Closing:** Hydraulic hinges ensure a slow, controlled lid closure.
- **Customizable:** Available in different colors to match hotel designs.
- **Easy Maintenance:** All parts are removable and dishwasher safe.

Internal separators can be packaged separately, providing an advantage during transportation

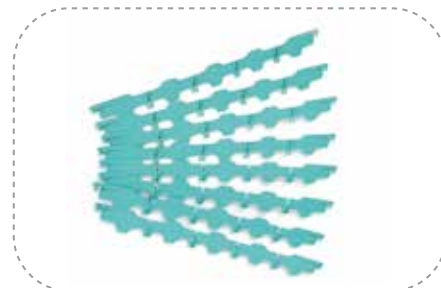

Internal separators separate from the body, provides easy storage for different models

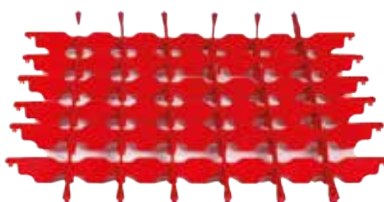

Easy locking mechanism

Separators that locked after installation cannot be removed again thanks to its extra strong locking mechanism

Separators packaged in thin sheets, gives easy storage

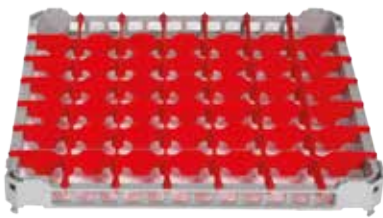

Easy extender locking mechanism

Extra locking mechanism on extenders
eliminates the risk of detachment after insertion

Thanks to the easily attachable extenders,
the height of the basket can be adjusted to the desired height.
